# We Want to Hear from You

**Tim McIntyre**

General Manager  
tmcintyre@lakeregion.coop

**Lake Region Electric Association works to continually learn from our members about their priorities so that we can better serve you.**

We live in a device-driven world. Our smartphones, tablets, laptops and an assortment of other devices help us communicate and connect. Companies spend billions pushing out a steady drumbeat of messages and information and constantly bombarding us with one-way communication. But is anyone listening on the other end?

At Lake Region Electric Association, we are not only listening, we are eager to hear from you. Whether you text us, respond to a survey or social media post, send an email or simply stop by and chat in person, we thrive on your feedback. Connecting with you helps us keep pace with our community's priorities and needs.

Because we are a cooperative, we have a different way of operating. Lake Region Electric Association exists to provide safe, reliable and affordable energy to you, the members of the co-op. Equally important is our mission to enrich the lives of the members we serve. We hope you will consider us more than your energy provider, but instead, as a local business that supports this community and powers economic development and prosperity for the people.

You will notice that throughout the year, we create opportunities for you and other community members to attend co-op gatherings and events in order to hear from you. These include our annual meeting and the adult member Basin Electric Tour. Lake Region Electric Association also sponsors events for area youth such as the Youth Tour to Washington, D.C., and the Youth Excursion to North Dakota.

We conduct various surveys to gather feedback so that we can plan for new initiatives, technical upgrades and improvements on existing co-op programs and services. Our planning is led by local members just like you who understand the needs of the community and are looking out for the long-term interests of the larger community. Additional ways that we try to reach the members of Lake Region Electric Association in order to gain feedback are by hosting a website: [www.lakeregion.coop](http://www.lakeregion.coop) and our current social media page is Facebook. We are also looking into the possibility of hosting a Twitter account to update members on work being done, outages and storms. Our monthly publication, *Lake Region Electric Ripples Cooperative Connections*, lands in the homes and businesses of all of our members. Members often call our offices or stop by to share ideas, concerns and general input. We just love to hear from you!

We are in the midst of significant changes in the energy sector, as technology and the drive for more renewables and a more balanced energy mix is impacting long-term planning. These are complex issues that we will be navigating in the coming months and years. This is why it's so important that we hear from you and other community members as we plot our course for the future.

Lake Region Electric Association works to continually learn from our members about their priorities so that we can better serve you – because your electric co-op was built by the community, for the community. But we can only improve, adapt and effectively plan for the future if we have two-way communication.

For our co-op and community to thrive now and in the future, we depend on hearing from you. I hope you will connect with us and let us know your perspective. You can always reach me directly by calling the Lake Region Electric Association office or emailing me at [tmcintyre@lakeregion.coop](mailto:tmcintyre@lakeregion.coop). I'm listening.

Thank you and God Bless,

Tim McIntyre

# 2020 Spending Package Equals Good News for Co-ops

Congress passed the 2020 spending package that contained the RURAL Act, the SECURE Act, and other key provisions for electric cooperatives and their consumer-members. President Trump then signed the bill.

## RURAL Act

Lake Region Electric Association has been working with other electric cooperatives across the country to pass the Rural Act. We previously shared information with our members in the *Lake Region Electric Ripples Cooperative Connections* magazine as well as on our Facebook page explaining what the RURAL Act is and why it is so important to our cooperative and our members.

The bill's passage fixes a problem created in 2017 when Congress passed the Tax Cuts and Jobs Act, which redefined government grants to co-ops as income rather than capital. That change made it difficult for many co-ops to abide by the 15 percent limit on nonmember income to keep their tax-exempt status. The RURAL Act once again exempts grants from being counted as income and is retroactive to the 2018 tax year.

Without the fix, some co-ops would have had to start paying taxes this spring after receiving grants in 2018 or 2019 to repair storm damage, bring high-speed internet to rural communities or invest in renewable energy and energy-efficiency programs. Many co-op leaders feared they would have to raise rates for members to pay the new taxes.

## SECURE Act

The Spending Package also included the SECURE Act, which will lower the premiums that electric co-ops in the RS Plan pay to the Pension Benefit Guaranty Corporation for low-risk defined benefit pension plans. This provision alone will save electric co-ops more than \$30 million annually.

## Repeals

- Repeals the "parking lot tax," which would have assessed taxes on about one-third of electric co-ops.
- Repeals the 40 percent "Cadillac tax" on employer health plans that will help protect health care benefits for all co-op employees.

The National Rural Electric Cooperative Association's CEO, Jim Matheson, credits co-ops like Lake Region Electric Association for helping get this legislation passed. "This success would not have been possible without the tireless commitment and support of co-op members like you. Your powerful voices and real-world impact stories cut through the clutter inside the beltway and forced lawmakers to action. These tremendous accomplishments highlight what is possible when the co-op network works together toward solutions – all of which ultimately work toward the goal of keeping electricity affordable and reliable for member-consumers."

# Space Heater Safety

Heating equipment is the second leading cause of home fires in the United States. More than 65,000 home fires are attributed to heating equipment each year. These fires result in hundreds of deaths, thousands of injuries and millions of dollars in property damage.

Portable electric space heaters can be a convenient source of supplemental heat for your home in cold weather. Unfortunately, they can pose significant fire and electric shock hazards if not used properly. Fire and electrical hazards can be caused by space heaters without adequate safety features, space heaters placed near combustibles, or space heaters that are improperly plugged in.

Safety should always be a top consideration when using space heaters. Here are some tips for keeping your home safe and warm when it's cold outside:

- Make sure your space heater has the label showing that it is listed by a recognized testing laboratory.
- Before using any space heater, read the manufacturer's instructions and warning labels carefully.
- Inspect heaters for cracked or broken plugs or loose connections before each use. If frayed, worn or damaged, do not use the heater.
- Never leave a space heater unattended. Turn it off when you're leaving a room or going to sleep, and don't let pets or children play too close to a space heater.
- Space heaters are only meant to provide supplemental heat and should never be used to warm bedding, cook food, dry clothing or thaw pipes.
- Install smoke alarms on every floor of your home and outside all sleeping areas and test them once a month.
- Proper placement of space heaters is critical. Heaters must be kept at least three feet away from anything that can burn, including papers, clothing and rugs.
- Locate space heaters out of high traffic areas and doorways where they may pose a tripping hazard.
- Plug space heaters directly into a wall outlet. Do not use an extension cord or power strip, which could overheat and result in a fire. Do not plug any other electrical devices into the same outlet as the heater.
- Place space heaters on level, flat surfaces. Never place heaters on cabinets, tables, furniture, or carpet, which can overheat and start a fire.
- Always unplug and safely store the heater when it is not in use.

# Getting Involved

The state legislatures of both Minnesota and South Dakota convened in early January. Need to contact your legislator while in Pierre or Saint Paul? Here's how:

## Contacting Members of South Dakota's Legislature:

Go to <http://sdlegislature.gov/> From there, you can search your senator or representatives, see the committees which they are assigned and send them an email. Need to reach them by phone? You can call and leave a message with the Senate at 605-773-3821 or with the House of Representatives at 605-773-3851. You can also send a fax to 605-773-6806.

## Contacting Minnesota Legislators:

**For contact information on Minnesota house members, visit:**

<https://www.house.leg.state.mn.us/members>

**For contact information on Minnesota senators, visit:**

<http://www.senate.leg.state.mn.us/members>

## KIDS CORNER SAFETY POSTER

**"Don't let anything get near your extension cords!"**

**Sierra Staufacker, 9 years old**

Sierra is the daughter of Cory and Staci Staufacker, Balaton, Minn. They are members of Lyon-Lincoln Electric Cooperative, Tyler, Minn.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

# Bountiful Brunch

## Pineapple-Zucchini Bread

3 eggs	3 cups flour
2 cups sugar	1 tsp. salt
2 tsp. vanilla	1 tsp. soda
1 cup oil	1 cup crushed pineapple, drained
2 cups peeled and grated zucchini	

Beat eggs, sugar, vanilla and oil. Mix in zucchini and dry ingredients; stir well. Fold in pineapple. Bake at 350°F for 1 hour. Makes 2 loaves.

**Geraldine Dahlin, Beresford, SD**

## Apple Pie Breakfast Bake

2 cans refrigerated French bread	1 (14 oz.) can sweetened condensed milk
1 cup butter, melted	1 tsp. apple pie spice
1 (21 oz.) can apple pie filling	1 tsp. vanilla

Bake loaves as directed on can; cool 20 minutes. Cut 1-1/2 loaves into 1/2-inch cubes to equal 7-1/2 cups. Reserve remaining 1/2 loaf for another use. Increase oven temperature to 375°F. In a 9x13-inch glass baking dish, evenly layer melted butter, apple pie filling and bread cubes. In a medium bowl, stir together milk, apple pie spice and vanilla. Pour over bread, pushing bread down to absorb liquid. Bake 25 to 30 minutes or until deep golden brown and bubbly. Cool 15 minutes. Serve warm with maple syrup. (Note: You may also use day-old French bread cut into 1/2-inch cubes.)

**Jean Osterman, Wheaton, MN**

## Breakfast Casserole

1 (8 oz.) can crescent rolls	1-1/2 cups shredded cheese
1 (16 oz.) pkg. bulk sausage, cooked and drained	8 eggs, lightly beaten
Diced onion, green pepper and mushrooms, optional	1/2 cup milk
16 to 32 oz. hash brown potatoes, depending on number of servings desired	1 pkg. country-style gravy mix, prepared according to package directions

Press crescent rolls in a lightly greased 9x13-inch pan. Spread with sausage crumbles and veggies. Layer hash browns on top. Sprinkle with cheese. Combine eggs with milk; pour over all. Spread on gravy. Bake at 325°F for 1 hour or until cooked through in the middle.

**Kim Jost, Agar, SD**

## Grilled Fruit with Cinnamon Oatmeal Crumble

6 T. butter, softened, divided	2 ripe peaches, halved and pitted
2 T. light brown sugar	2 ripe plums, halved and pitted
1 tsp. cinnamon, ground	
3/4 cup quick-cooking oats	

Mix butter, brown sugar and cinnamon in a medium bowl. Reserve 2 T.; set aside. Add oats to remaining butter mixture, stirring until well blended. Brush fruit with reserved butter mixture. Place cut-side down on grill over medium heat. Tent with foil or close grill lid. Grill 2 minutes or until grill marks appear. Turn fruit cut-side up; spoon oat mixture evenly on top of each piece. Return foil tent or close lid. Grill 3 minutes longer or until fruit is tender and topping is crisp. Serve topped with whipped cream or ice cream, if desired. Cooking over a campfire? Place grill grate over top of campfire. Grill fruit as directed, rearranging hot coals as needed to maintain even direct heat. Makes 4 servings

*Nutritional Information Per Serving: Calories 290, Total Fat 18g, Fiber 3g, Cholesterol 45mg, Sodium 137mg, Carbohydrates 29g, Protein 3g*

**Pictured, Cooperative Connections**

## Omelet in a Bag

2 large eggs	Green pepper, diced
Ham or bacon pieces	Mushrooms, chopped
Onion, chopped	Grated cheese
Tomato, diced	

Give each guest a quart-size Ziploc freezer bag and have them write their name on the bag with a permanent marker. Crack 2 eggs into each bag (not more than 2). Shake to combine them. Put out a variety of ingredients and let each guest choose what they want in their omelet. Shake the bag. Zip the bag after making sure to get all the air out. Bring a large kettle of water to a full rolling boil. Place the bags into the water. When the water begins to boil again, boil for exactly 14 minutes. You can usually cook 6 to 8 omelets at a time. For more, make another kettle of boiling water. Open bags and the omelet will roll out easily. Serve with fresh fruit and coffee cake.

**Roxanna Streckfuss, Mansfield, SD**

Please send your favorite seafood, appetizer and beverage recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in June 2020. All entries must include your name, mailing address, telephone number and cooperative name.

You're at the heart of everything we do.

**HAPPY VALENTINE'S DAY**  
FROM OUR CO-OP FAMILY TO YOURS!

## DO YOU DRIVE AN ELECTRIC VEHICLE?

WE WOULD LIKE TO  
HEAR FROM YOU!  
WE ARE CONDUCTING  
AN INFORMAL SURVEY  
TO GATHER INFORMATION  
ABOUT ELECTRIC VEHICLE  
USE IN OUR AREA.  
PLEASE CONTACT OUR  
OFFICE!

Electric vehicle growth is expected to continue to rise across the U.S. There are also plans to install thousands of additional charging stations across the country. With the infrastructure in place, people will soon be able to drive electric from coast to coast with plenty of options to plug in along the way. Let's ride.

## Scholarship Opportunities Available Through LREA

By Laura London

Lake Region Electric Association is dedicated to supporting the youth in the communities that we serve! Education and Concern for Community are two of the Seven Cooperative Principles which guide us. One way that we show this dedication and concern is by providing scholarship opportunities for youth who intend to further their education by attending a vocational program or a traditional college or university. Lake Region Electric Association has a variety of scholarship opportunities available for area students: The Duane Snaza Memorial Scholarship, the Basin Electric Power Cooperative Scholarship and the Charles Johnson Trust Scholarship.

To apply for these scholarship opportunities, students must complete the required criteria and the scholarship application. Applications can be obtained from your high school counselor, by visiting our website ([www.lakeregion.coop](http://www.lakeregion.coop)) or from the Lake Region Electric Association office. Applicants must provide all the required information and complete the scholarship application. Submissions MUST BE POST-MARKED OR RETURNED BY FEB. 10, 2020, to Lake Region Electric Association, PO Box 341, Webster, SD 57274, in order to be considered eligible for this scholarship.

For more information, visit our website at [www.lakeregion.coop](http://www.lakeregion.coop) or contact Laura London at Lake Region Electric Association by email: [llondon@lakeregion.coop](mailto:llondon@lakeregion.coop) or by telephone: 605-345-3379 or 1-800-657-5869.

# Student Interns at Lake Region

Laura London

[llondon@lrea.coop](mailto:llondon@lrea.coop)

Webster Area High School student Louis Wiley recently interned at Lake Region Electric Association. Louis is the son of Jeff and Kristen Wiley and graduates in 2021. Louis chose Lake Region Electric for his internship because he wanted to learn more about the electric industry.

During his internship, Louis spent time with several different departments. There are many aspects to working in the electric industry and Lake Region Electric Association being a cooperative puts another spin on things. General manager Tim McIntyre explained the type of power we use at LREA and where that energy comes from. Brett Kwasniewski, manager of member services, talked with Louis about electrical demand and other aspects of providing electricity to our members. The IT Department taught Louis how to program and read a meter, such as those on your homes and businesses. If nothing else, Louis should have a good understanding of how to read his electric bill when he's on his own and ready to pay bills.

Louis said that he especially enjoyed the hands-on experience and seeing how people work out in the field. Louis had the opportunity to get in one of the bucket trucks at the office; the Operations Department's Dan Williams and Jim Grimes talked with him about not having a fear of heights and about safety when working in the electrical industry. One hands-on experience that Louis had was building an electric extension cord with Material Clerk Leonard Deibert.

When asked about his future plans, Louis replied, "I want to go to Mitchel Tech or LATI for the energy program and I'll decide exactly what area I want to go into." Louis feels that the things he learned at Lake Region will have a big influence on his future career choice.

Students wishing to intern with Lake Region Electric Association are encouraged to visit with their high school or college advisors.

# ENERGIZING COMMUNITIES

We're led by members like you. Which means we're not out to make money. Instead, we're building communities by listening to your needs. We're shaped by the people we serve.

## REASONS TO LOVE YOUR ELECTRIC CO-OP

Delivering More than Just Electricity

**Brenda Kleinjan**

editor@sdrea.coop

From reliable energy to community involvement, there are a lot of reasons why co-op members love their electric cooperatives.

### Co-Ops Are Local, Community-Focused Organizations

Co-ops have a rich history of serving their members and are facing the future with innovative ideas to help their members and grow their local communities.

Local people helping out. From billing clerks to line workers and every job in between, the people working at your local electric cooperative are the ones you'll see in your communities. They are serving on volunteer fire departments and as first responders, serving on school boards and county commissions, as ushers at church and as youth sports coaches.

Sioux Valley Energy employees get final instructions before embarking on their meal delivery routes.

Some cooperatives have launched employee community service days where local communities or organizations benefit from a day of service, whether it be a town clean up, restoring a rural cemetery, delivering meals to shut-ins or helping others in need.

### Keeping Members Informed

Whether it's through this magazine, which reaches members each month or through social media channels like Facebook and Twitter or mobile apps like SmartHub, cooperatives continually strive to inform their member-owners about events and issues that matter. From a quick post or tweet about why the power may have blinked or celebrating the achievements of area youth, co-ops are communicating with their members and connecting them to their community. As storms approach, co-ops offer helpful tips for preparing for inclement weather and how to deal with the aftermath of storms.

### Helping Members Save Money

Co-op demand response and load management programs have helped members save money for decades. And now, with interactive tools like SmartHub, an increasing number of co-op members are accessing information about their home's energy use right from their mobile device or computer. Several co-ops offer energy audits and other ways to reduce energy use.

Appliance rebates, loans for heating and cooling equipment and reduced rates for some energy use

are offered by some co-ops in the state. Check with yours to find out what programs could benefit you.

### Diversifying Energy Resources

Cooperatives have a history of using an all-of-the-above approach to meeting members' energy needs. The first utility-scale wind project in South Dakota was built by co-ops and several co-ops have solar demonstration projects to help members learn about solar grid interconnection and other aspects of the resource.

### Investing in Youth

When it comes to looking to the future, co-ops have the youth in their communities in mind. Each year, co-ops invest more than \$100,000 in scholarships for students pursuing further education at colleges or technical schools. Dozens of students have the opportunity to go to Washington, D.C., for the annual rural electric youth tour, courtesy of their local electric cooperative. Several co-ops in the state send students on the four-day Youth Excursion to North Dakota each summer to explore energy careers and cooperatives. And throughout the school year, Co-ops in the Classroom and other safety demonstrations visit schools across the region to help younger students learn about using electricity wisely and how so be safe around it.

# RENEWABLE ENERGY CREDIT (REC) PROGRAM

## SHOWCASE YOUR SUPPORT FOR RENEWABLE ENERGY

Sign up for Lake Region Electric's REC program and showcase your business's support for renewable energy.

**Contact us to learn more!**

**605.345.3379**

**[bkwasniewski@lakeregion.coop](mailto:bkwasniewski@lakeregion.coop)**

## POWER YOUR BUSINESS ON 100% RENEWABLE ENERGY

We're excited to help you reach your business's renewable energy goals! After signing up for our REC program, you'll receive a REC certificate and other promotional materials that you can showcase to your business's customers.

## FREQUENTLY ASKED QUESTIONS

**What is a Renewable Energy Credit (REC)?** 1 megawatt hour produced by a renewable energy source equals 1 REC. RECs are also called Green Tags and they represent the valuable renewable attributes of wind energy.

**Do I need to purchase any special equipment?** No special equipment is needed. Lake Region Electric will fulfill all your electric needs while you enjoy the benefits of powering your business with renewable energy.

**Where do RECs come from?** Our RECs come from several wind farms in our region that supply renewable energy to our cooperative.

**How much does it cost to power my home or business on 100% renewable energy?** \$1 per MWh. Example: If you use 1,200 kWh per month, participating in the REC program would add \$1.20 + tax to your monthly bill.

A Touchstone Energy® Cooperative 

Lake Region Electric Association, Inc. is an equal opportunity provider & employer.

Lineman Jesse Pesall loads gifts donated for the Spirit of Christmas Tree.

# Lake Region Electric and The Spirit of Christmas

Laura London

llondon@lrea.coop

Lake Region Electric Association employees donated gifts for local children this Christmas. The Spirit of Christmas Tree, sponsored by Webster Community Club, Dacotah, CorTrust and Great Western banks of Webster was made available for those wishing to spread the Spirit of Christmas to those less fortunate. Tags could be picked up at any of the three local banks for gifts to be purchased. The children's names are anonymous. The tag lists the child's age and interests; children who wanted or needed clothing as their gift listed their clothing size. Some of the Christmas wishes were for Star Wars, Ninja Turtles, Legos, trucks, dinosaurs, balls, craft items, unicorns, hair and make-up items and clothing.

Donna Sattler, LREA director of finance/office services manager, stopped at Dacotah Bank shortly after Thanksgiving to pick a few tags for the employees of Lake Region Electric Association to purchase gifts for area children. The generosity of Lake Region Electric Association employees shone through and prompted a second trip to get additional tags. Some of the employees took tags and purchased gifts themselves, while others chose to donate money. The donated money was pooled together and Laura purchased gifts while out doing some of her own Christmas shopping.

Vinson Dargatz, an apprentice electrician at Lake Region, created a learning opportunity for his children by taking them shopping for a couple of gifts. He explained to the children that Christmas is a time for giving and they should feel good about giving to

other kids who maybe don't have as much as they do. This can be a tough concept for smaller children who are constantly being asked, "What do you want for Christmas?"

Vinson said the kids understood and even though the toys they chose were so cool they wanted to keep them for themselves, they felt good about buying gifts and wrapping them for another child.

Lake Region Electric Association Lineman Jesse Pesall loaded the gifts up to haul to the bank. Material Clerk Leonard Deibert accompanied Jesse to deliver the gifts and said even though they weren't wearing their Santa hats, the bank employees welcomed them with open doors and directed them to the tree for drop-off. Thank you, employees of Lake Region Electric Association, for your generosity and concern for our community!

# Nemo 500 Outhouse Races

NAJA Shrine  
Transportation  
Fund for Kids  
Benefits from  
Outdoor Event

Brenda Kleinjan

editor@sdrea.coop

**We called it the  
Nemo 500 because  
it sounded good.**

When one thinks of racing, cars, horses or motorcycles likely come to mind. But, in the Black Hills community of Nemo, outhouses – equipped with wheels, skis or both – are the vehicle of choice.

While each outhouse must be equipped with a seat with one hole, there are additional basic requirements in this competition designed to raise funds for the NAJA Shrine Kids Transportation Fund.

First, each outhouse will have a rider. And during the race, that rider will trade places with a teammate.

“There always has to be someone on the throne,” said Ervin “Red” Alspaw, a Shriner with the Oasis of Deadwood and one of the contacts for the race.

The outhouse must be at least five feet tall and the door (if there is one) has to stay open during the race.

The outhouse must have four walls and a roof and the team’s name must be on each of the walls.

“It’s a hoot,” said Alspaw.

Money raised at the event helps Shriners cover the transportation expenses of some 630 children in western South Dakota who seek care at Shriners Hospitals

A team prepares to race their outhouse in the 2017 competition.

nationwide.

“We called it the Nemo 500 because it sounded good,” said Troy Saye, race organizer and owner of the Nemo Guest Ranch where the event is held.

“We stepped it off a few years ago and it’s actually about 970 feet. You start at the restaurant and at midway everyone runs around the outhouse, retrieving a colored roll of toilet paper which must be placed in the correct order on a plunger.

Alliterations, euphemisms and creativity may make for memorable team names, but speed is the name of the game as the fastest team to complete the

Kids compete in the scoop shovel races.

## The Rules

### OUTHOUSE RACE RULES and STRUCTURE

- 1) Outhouse can only be human powered. No electric-, solar- or gas-powered assistance. The outhouse must have four walls, roof, doorway and seat with at least one hole. It may have a door, but the door must remain securely open during the race.
- 2) The outhouse must be a minimum of nine square feet at the base and a maximum overall width not to exceed six feet (including grasping or pushing devices). A minimum height of five feet from the floor to the highest point of the roof.
- 3) Any number and size of wheels or skis may be used.
- 4) Any device for pushing or pulling the outhouse may be used except ropes. All pushing or pulling devices must be secured solid.
- 5) Outhouses may be built from any material but glass and must be structurally sound.
- 6) Each entry must have an outhouse name that is to be displayed on each side of the structure. Sponsors' names may be displayed anywhere on the outside.
- 7) There will be three age divisions. (Age divisions will be determined by average team ages. Add all team members' ages and divide by the number of team members.)
  - Division 1: Ages 12 to 25
  - Division 2: Ages 26 to 45
  - Division 3: Ages 46 and over

### Good to know:

Teams consist of two to five people, one of which must ride inside the outhouse.

Safety gear including helmets are required for all members and ice cleats are recommended.

Outhouse passengers must be 12 years old or older. Handles or seatbelts are required for the outhouse passengers.

Teams' dress is to reflect the theme of their entry.

Teams make a mandatory pit stop at mid race for a fire-drill. Each member must run around the outhouse three times and the rider must switch places with one of the pushers. Each team member will be required to place a color-coded roll of toilet paper on a color-coded plunger in order of color scheme provided at race time. The race will be timed from start to finish, the objective is to get the lowest time to win.

The costumed Sesame Streak team poses with their People's Choice outhouse trophy after the 2016 race.

race is the winner.

Winners in each of the age divisions get an outhouse trophy hand-made by Troy and Willie Saye.

The Sayes created the event after a 2006 visit from Willie's cousin, shortly after they bought the Nemo Guest Ranch.

"He said he had to get home for an outhouse race. We didn't know what it was," said Troy. The couple researched the event and found that several other

states held races. They developed their rules for the Nemo event. Early races were held just for fun or to raise money for different organizations. The race has been a benefit for the NAJA Shrine Kids Transportation Fund for the last eight or nine years.

The creative names don't stop at the race team names. It takes a certain fortitude to dip a spoon into some of the entries in the chili cook-off contest where cooks serve up three gallons of chili with names like "Presidential Poopers Chili" and "Dave's Chunky Pork and Beef Chili."

Kids can compete in the Scoop Shovel Races, but competitors must provide their own scoop shovel.

If you're going, check-in for the three divisions is at 10 a.m. and race time is 1 p.m. Preregister your team by Feb. 1 to receive a T-shirt.

If you have a team but don't have

an outhouse to race in, contact the Nemo Guest Ranch to see if theirs is available.

Advice for first-time attendees? Arrive early, dress warm and be prepared for

a bit of a walk (late-comers have had to park a half-mile away from the event.)

Attendance at the event varies with the weather, Saye said. Crowds range from 1,000 people up to 2,400 people when the race time temperature was 53 degrees.

"You have got to see it to really enjoy it," said Saye.

"When we first started, we never imagined it would take off the way it did," said Saye.

**When we first started, we never imagined it would take off the way it did.**

Kianna Knutson and Shane Binger left their 2018 wedding reception with a sparkler send off.

# YOUTH TOUR SPARKS

## Participants Make Lifetime Connections

**Brenda Kleinjan**

editor@sdrea.coop

The annual Rural Electric Youth Tour is billed as a trip-of-a-lifetime, which it is for the thousands of teenagers who have participated since it began in 1963. But for a certain few, the weeklong trip filled with congressional visits, sight-seeing and co-op educational opportunities was more life altering than they possibly dreamed.

### Kianna and Shane, 2011

Kianna Knutson and Shane Binger participated in the 2011 trip. Kianna, from Philip, S.D., represented West Central Electric Cooperative in Murdo, S.D., while Shane, from Tulare, S.D., represented Northern Electric Cooperative in Bath, S.D.

During the week of travel, the two would talk some and share experiences. A visit to the Pentagon Memorial was particularly memorable for the two.

“For me, we hit it off right away on the tour,” said Kianna.

“But we went our separate ways. Whenever I’d head west, I’d try to stop in Philip and see her,” said Shane. “We kept in touch until we got to SDSU together.”

They started dating while attending South Dakota State University in Brookings, S.D. Shane graduated in December 2015 and Kianna in May 2016 and the two married in September 2018. They live in Redfield, S.D., and Kianna works in Aberdeen while Shane works in Tulare.

“The Youth Tour was one of my most favorite trips,” said Kianna. “It was a great way to meet people and make friends. It turned out one of them stuck for life.”

A sign at the Bingers’ wedding reception highlights the sparks that started with their 2011 Youth Tour.

For Shane, an additional outcome of the trip was that it sparked an interest in politics.

“It was an opportunity to see congress-people as actual people. That drove me to go back and intern with Sen. John Thune in 2015,” said Shane.

### Riley and Kailee, 2009

Riley Schwader and Kailee Koester attended the 2009 Youth Tour together. Riley, of Winifred, S.D, represented Central Electric Cooperative in Mitchell, S.D., while Kailee of Redfield, represented Northern Electric.

They married in June 2014 on the heels of that year’s Youth Tour, which Riley’s sister participated (as did Kianna Knutson’s sister.)

The Schwaders live in Howard where they raise their two sons and where Kailee teaches fourth grade. The family was recently featured in a “ReEnergizing Rural” commercial talking about the Co-ops in the Classroom project.

### Doug and Roberta, 1973

Roberta Johnson, a 4-Her from Parker, S.D., chosen to represent Turner County and Doug Stuebner, a 4-Her from Olivet, S.D., selected to represent Hutchinson County, met on the 1973 Youth Tour as the delegates for Turner-Hutchinson Electric Cooperative (now Southeastern Electric Cooperative), based in Marion, S.D.

“We started dating on Thursday, Oct. 18, 1973, when he asked me to go to the Hobo Week street dance at SDSU,” said Roberta, noting that Doug often wondered how she could remember the date. “I told him it was easy to remember because it was two days before her sister got married.”

Things clicked for the two and they made plans to marry.

“If I hadn’t been the South Dakota Pork Queen, we probably would have been married in December of 1975. But I needed to be single to compete at the national level, so Doug was willing to wait until the national competition was held in March of 1976. When someone else was crowned the national pork queen, Doug and I moved forward with our wedding

## The Youth Tour was one of my most favorite trips.

plans and were married on Father’s Day, June 20, 1976. Even without the title of pork queen, I could still educate others about the nutritional value and versatility of pork when I became involved with the Porkettes.”

The two graduated from SDSU with majors in ag education and home economics education and were preparing to head to Marietta, Minn., when an opportunity to take over his grandparents’ farm came up.

“Entering farming had been a long-range goal, but when the farming opportunity arrived earlier than expected, we accepted. So, once again, Turner-Hutchinson Electric influenced our lives since they provided the electricity for our home and farming operation. We continued farming until June of 2006 when Doug had surgery for brain cancer. Initially, we were told the life expectancy for this type of treatable, but not curable, cancer was 18 months to two years. But by God’s grace and through hundreds of prayers, he has outlived that life expectancy by 11 years,” said Roberta.

The two moved into Menno in 2008 where Roberta continues teaching high school family and consumer sciences and middle school social studies.

### Ethan and Vanessa, 2012

Ethan Ryberg of Buffalo Lake, Minn., was selected to represent McLeod Co-op Power in Glencoe, Minn., on the 2012 Youth Tour, the same year that Vanessa Peterson of Rosholt, S.D., was selected to represent Traverse Electric Cooperative in Wheaton, Minn. The two traveled with the Minnesota Youth Tour delegation that year.

While the two lived three hours apart, they began dating that fall and in 2013, they attended North Dakota State University in Fargo, N.D., together, majoring in pharmacy.

After their 2019 graduation, they have settled in the Bemidji area where they both work.

Electric cooperatives in South Dakota and Minnesota are once again taking applications for the annual Youth Tour to Washington, D.C. The 2020 participants might not find their future mate, but they will definitely have experiences of a lifetime.

The Schwaders live in Howard where Kailee teaches. They were recently featured in the electric cooperative “ReEnergizing Rural” campaign.
